Pat,

You need LEAPS 5.2.4 and RSDE 4.3 from here: V:\DEPT14\4 Software Training & Reference\RSDE\RSDE 4.3

LEAPS External Libraries 5.2.3 from here: V:\DEPT14\4 Software Training & Reference\RSDE\RSDE 4.2

And IHDE 9.2 (unless there's a more up-to-date version available, I don't think we have it) from here: V:\DEPT14\4 Software Training & Reference\RSDE\RSDE 4.0\Installation Files

From there you need to install them in this order:

1. Uninstall all NSWCCD products (LEAPS, ASSET, RSDE, etc.)
2. Reboot
3. Install LEAPS External Libraries
4. Install LEAPS 5.2.4
5. Install RSDE 4.3
6. Install IHDE 9.2
7. Install ASSET 6.3
8. Check to make sure RSDE opens, if so just reboot for good measure and you're done

The latest ReadMe in this RSDE 4.3 file notes to NOT install to the default location, instead install all of them to C:/Users/Public/Public Documents. You can install somewhere else in C:/Users (I did) but then you need an administrator to give you full access to that folder, which adds time to the whole process. All Keith (or other IT) has to do is put in his administrator login every time you want to download

Subject: RSDE Installation

Mike and Keith,

I guess I need to get RSDE installed sometime this week. Please let me know what I may need to do to get this done.

Thanks

Pat
